

METADATA

Title: Medical Informatics

Other Titles: Biomedical Digital Signal Processing

Language: Greek

ISBN: 978-960-603-231-8

Subject: MEDICINE AND HEALTH SCIENCES, LIFE SCIENCES, BIOLOGICAL SCIENCES, ENGINEERING AND TECHNOLOGY

Keywords: Medical Informatics / Medical Information / Medical Information Standarts / Medical Nomenclature / Medical Classification

Bibliographic Reference: Tsipouras, M., Giannakeas, N., Karvounis, E., & Tzallas, A. (2015). Medical Informatics [Undergraduate textbook]. Kallipos, Open Academic Editions. <http://dx.doi.org/10.57713/kallipos-733>

Abstract

The book "Ιατρική Πληροφορική" (Medical Informatics) is intended for undergraduate and graduate students studying the subject of medical informatics and the applications of information

systems in medicine, as well as the processing of biomedical signals. Additionally, it can be used by non-specialist readers as well as researchers in the field.
