Abstract

The book is addressed to undergraduate and postgraduate students who teach courses in International Political Economy, International Relations, Global Governance and wish to deepen their knowledge in this field. As the text satisfies teaching needs, it is mainly addressed to students, but has appeal to both the general readership and specialized scholars. The book presents the most important theoretical approaches to International Political Economy (IPE) and focuses on individual topics of special emphasis in the study of IPE. In particular,

it deals with the understanding of the concept of "International Political Economy", with the emergence of IPE as a separate subject, with the dynamics of the global economy that determined the content of IPE and with individual theoretical approaches. The main thematic areas of the book include the concept of international political economy, traditional and contemporary theoretical approaches, international trade, the international financial system, international production, circularity and globalization, and development theory and policy.
