

## METADATA

**Title:** Ship Propulsion

**Other Titles:** -

**Language:** Greek

**ISBN:** 978-960-603-514-2 (set)

**Subject:** ENGINEERING AND TECHNOLOGY

**Keywords:** Ship propulsion / Main engine selection / Propeller design / CFD applications

**Bibliographic Reference:** Loukakis, T., Dodoulas, A., Politis, G., Tzabiras, G., Kouremenos, D., & Maliatsos, K. (2016). Ship Propulsion [Undergraduate textbook]. Kallipos, Open Academic Editions. <http://dx.doi.org/10.57713/kallipos-717>

### Abstract

Volume A: Ship resistance and propulsion. Preliminary design/optimization of ship propeller. Main engine selection. Speed-power trials. Controllable ship propellers. Practical aspects of ship propulsion. Tuning of Diesel marine engines.

Volume B: Analytical design of ship propellers. Applications of CFD in ship resistance and propulsion.

Volume C: Computer programs. Design data.

Volume D: Full text bibliographical references.
