

METADATA

Title: Development and Management of Computer Networks

Other Titles: -

Language: Greek

ISBN: 978-960-603-191-5

Subject: ENGINEERING AND TECHNOLOGY, MATHEMATICS AND COMPUTER SCIENCE

Keywords: Computer Networks / Management / Monitoring / Evaluation / Deployment

Bibliographic Reference: Fouliras, P. (2015). Development and Management of Computer Networks [Undergraduate textbook]. Kallipos, Open Academic Editions. <http://dx.doi.org/10.57713/kallipos-925>

Abstract

The textbook can be proven to be very valuable for the reader who attends the course "Network Development and Management", as it aims at familiarizing the reader with modern methods of monitoring,

evaluation, organization, development and general management of modern Computer Networks. Laboratory exercises are included so that students can gain experience during their application.
