

METADATA

Title: Farm machinery for application of crop inputs

Other Titles: -

Language: Greek

ISBN: 978-960-603-436-7

Subject: NATURAL SCIENCES AND AGRICULTURAL SCIENCES

Keywords: Machinery for nutrient applications in the crops / Plant protection machinery / Mechanical weed control / Machinery for irrigation / Machinery for thinning

Bibliographic Reference: Gemtos, T., & Kavalaris, C. (2015). Farm machinery for application of crop inputs [Undergraduate textbook]. Kallipos, Open Academic Editions. <http://dx.doi.org/10.57713/kallipos-856>

Abstract

The book will cover a gap that exists today in Agricultural Engineering literature, namely the part concerning Agricultural Machinery for Crop Care, including machinery for applying nutrients

to the soil (fertilizer spreaders, etc.), weed control machinery (cultivators), machinery for mechanical thinning, and plant protection machinery (sprayers, dusters, granular applicators).
